

**IN THE CLAIMS:**

**Please cancel** claims 7 and 8. **Please also amend** claim 1, as shown in the complete list of claims that is presented below.

1. (currently amended) An improved resin pulley formed at least in part of a resin composition, wherein the improvement comprises:

the resin composition contains a phenol resin as a base resin, and contains [[20]]  
33 to 50 % by weight of an inorganic powder having a Mohs hardness of not less than  
6.5, 20 to [[40 %]] 30 % by weight of a reinforcing fiber, and 1 to 5 % by weight of  
fluororesin powder having an average particle diameter of not more than 10  $\mu\text{m}$  as a  
lubricant,

wherein the inorganic powder has a content ratio (% by weight) Wp, the  
reinforcing fiber has a content ratio (% by weight) Wf, and Wp>Wf.

2. (original) The resin pulley according to claim 1, wherein  
the inorganic powder is a spherical silica powder having an average particle  
diameter of not more than 30  $\mu\text{m}$ .

Claim 3 (cancelled).

4. (original) The resin pulley according to claim 1, wherein  
the reinforcing fiber is a glass fiber.

5. (original) The resin pulley according to claim 1, wherein  
the phenol resin is a phenol resin having a number average molecular weight of 600 to  
900.

6. (previously presented) The resin pulley according to claim 1, wherein the  
average diameter of the fluororesin powder is not less than 1  $\mu\text{m}$ .

Claims 7 and 8 (cancelled).

9. (previously presented) The resin pulley according to claim 1, wherein the  
phenol resin has a content ratio (% by weight) Wr, and Wp>Wr.
